COLLEGE OF COMPUTING AND INFORMATION SCIENCES

CENTER FOR INNOVATIONS & PROFESSIONAL SKILLS DEVELOPMENT

31st March, 2020

Dear Sir/Madam,

RECOMMENDATION FOR MS NAKAZIBWE MOUREEN

It is my pleasure to recommend Ms. Nakazibwe Moureen for admission to Kalinga Institute of Technology for a Master's degree in Computer Science and Business Analysis. I came to know Moureen in 2013 when I was her course lecturer of CCNA during her BSc in Information Systems. She distinguished herself by submitting an exceptionally well researched and interesting project on Enterprise Computer Networks.

I followed up with Ms. Nakazibwe professional life and found out that she has been involved with a lot. She gained experience of over 3 years in managing data management systems, project management and research, monitoring and evaluation, writing and editing. And has taken up several certifications especially in computer skills, she completed software development course with Andela Women in tech, network and monitoring course which shows she has improved her educational skills with extra trainings and certifications

Moureen has exceptionally good writing ability and research skills; she is an activist of innovation for change using her information Technology skills an entrepreneur and a Founder of a social start-up Excavate Technologies an Innovation Company that was started in the year 2016 by a team of three, with the aim of using Technology skills to create solutions that can address social problems in her community trough integration of technology within the system, Moureen has proved her commitment in community development through participating in several community Leadership activities both national and international youth leadership Programs Like African Change makers cohort 3, 2019, the International Youth Diplomacy conference that was held at the University of Ghana, Legon and Andela Women In Tech in 2018 and she has carried on her software development skills by participating on women in Technology project with Hive Tech Hub where she is currently growing her software development skills. She also expressed her written work in a clear and concise manner, as well as interesting to read which she demonstrated in group assignments with good teamwork skills

I have as well, known Moureen to be an outgoing and a proactive since 2012 when she was a class coordinator of her class for the three years.

At a personal level, Moureen is a well-disciplined, industrious student with a pleasant personality. She went well beyond the course requirements in the quantity and quality of his project, putting in a lot of extra research. Throughout the course she was not only interested in and motivated to learn the

material, but he also put great work into assimilating it to his own experience and developing her own ideas about each computer networking topic that we discussed. Her performance in my class is a good indication of how she would perform as a graduate student; she would be an extremely positive asset to your program. I can be of any further assistance, or provide you with any further information, please do not hesitate to contact me on my email (rtuhaise@cit.ac.ug).

TUHAISE ROBERT
